

Question 20.8

Topic: Reporting Hourly Emissions Data

Question: How do I report hourly emissions data for a subtractive stack configuration?

Answer: Report hourly data for the subtractive stack configuration at each monitored location (i.e., at the common stack and at each nonaffected unit monitoring location), as you would for any other configuration. Report *only* the measured data. Do *not* report the hourly mass emission values determined by subtraction for the *affected* units. If you have additional reporting questions, contact EPA.
