

## **Question 24.14**

**Topic:** Calculation of Appendix E NO<sub>x</sub> Emission Rate Data Availability

**Question:** How does EPA calculate the percent data availability for an Appendix E unit?

**Answer:** The Agency calculates the Appendix E NO<sub>x</sub> emission rate data availability from the most recent 2,160 hours of data or, if there are less than 2,160 hours of data in the previous three years, EPA will base the calculation on all of the data from those three years.
