

### **Question 3.12**

**Topic:** Test Method 2H -- Minimum Acceptable Calculated Wall Effects Adjustment Factor (WAF)

**Question:** If I calculate the WAF based on a Method 1 traverse consisting of more than 16 traverse points, do the minimum acceptable wall effects adjustment factors of 0.9800 for a partial traverse and 0.9700 for a complete traverse still apply?

**Answer:** Yes. These limits always apply. The likely results of using more than 16 Method 1 traverse points are twofold: (1) a lower average velocity; and (2) a WAF that is greater than or equal to 0.9800 for a partial traverse and 0.9700 for a complete traverse.
